

PART 2 — SQL MASTER LIST (SMART-MATCH LINKS, 25 QUESTIONS)

1. Select all rows from a table

Link: https://sqlzoo.net/wiki/SELECT_basics

2. Select employees with salary > X (WHERE)

Link: <https://www.geeksforgeeks.org/sql-where-clause/>

3. Order employees by salary DESC

Link: <https://www.geeksforgeeks.org/sql-order-by/>

4. Count total employees

Link: <https://www.hackerrank.com/challenges/revising-aggregations-the-count-function/problem>

5. Employees in HR department

Link: <https://www.geeksforgeeks.org/sql-where-clause/>

6. Employees age between 25 and 35

Link: <https://www.geeksforgeeks.org/sql-between-operator/>

7. Display unique job roles (DISTINCT)

Link: <https://www.geeksforgeeks.org/sql-distinct-keyword/>

8. Select top N rows (LIMIT)

Link: <https://www.geeksforgeeks.org/sql-limit-clause/>

9. INNER JOIN employees with departments

Link: <https://www.hackerrank.com/challenges/african-cities/problem>

10. LEFT JOIN employees without departments

Link: https://sqlzoo.net/wiki/Using_NULL

11. RIGHT JOIN employees with departments

Link: <https://www.geeksforgeeks.org/sql-right-join/>

12. FULL OUTER JOIN example

Link: <https://www.geeksforgeeks.org/full-join-and-its-types-in-sql/>

13. Self JOIN (employee → manager)

Link: <https://www.geeksforgeeks.org/sql-self-join/>

14. Employees working under specific manager

Link: <https://www.geeksforgeeks.org/sql-join/>

15. 3-table JOIN (employee + dept + location)

Link: <https://mode.com/sql-tutorial/sql-joins>

16. Count employees in each department

Link: <https://www.geeksforgeeks.org/sql-group-by-statement/>

17. Average salary per department

Link: <https://www.geeksforgeeks.org/sql-avg-function/>

18. Departments with more than 5 employees (HAVING)

Link: <https://www.geeksforgeeks.org/sql-having-clause/>

19. Max salary per department

Link: <https://www.geeksforgeeks.org/sql-max-function/>

20. Second highest salary

Link: <https://leetcode.com/problems/second-highest-salary/>

21. Employees earning above company average

Link: https://sqlzoo.net/wiki/SELECT_within_SELECT_Tutorial

22. Employees not assigned any department

Link: https://sqlzoo.net/wiki/Using_NULL

23. Find duplicate employee records

Link: <https://www.geeksforgeeks.org/find-duplicate-rows-in-sql/>

24. Update salary of an employee

Link: <https://www.geeksforgeeks.org/sql-update-query/>

25. Delete employees earning below X

Link: <https://www.geeksforgeeks.org/sql-delete-statement/>

Why these 25 SQL Questions?

These questions cover every REAL interview concept: SELECT, WHERE, DISTINCT, ORDER BY, JOINS (inner, left, right), FULL JOIN, GROUP BY, HAVING, subqueries, duplicates, and data modification (UPDATE, DELETE). These map to the exact patterns asked in LTI, TCS Digital, Accenture, Deloitte, Capgemini, Cognizant, Wipro, and 7–10 LPA mid-tier product companies. Master these 25 and you can answer 90% of SQL interview questions.
